I	**Channels**	who asks for work, and who sees the result
I · IV	**Agent runtime**	bounded reasoning, patterns, durable run state
V	**Collaboration**	specialists, peer agents, external protocols
II	**Knowledge**	governed knowledge, rules, catalogs, per-run context
V	**Control points**	LLM Gateway for inference, Tool Gateway for effects
VI	**Security**	identity, guardrails, approvals — spans every band
—	**Systems of record**	where effects commit and stay authoritative
VII	**Evidence**	traces, evaluation, the loop into the next release
III · VIII	**Platform and operations**	the paved road that builds, releases and runs it
